[Abu Noman Basar](#)

Software Engineer (Python),  
eAppair Limited  
Django Instructor at aiQuest Intelligence

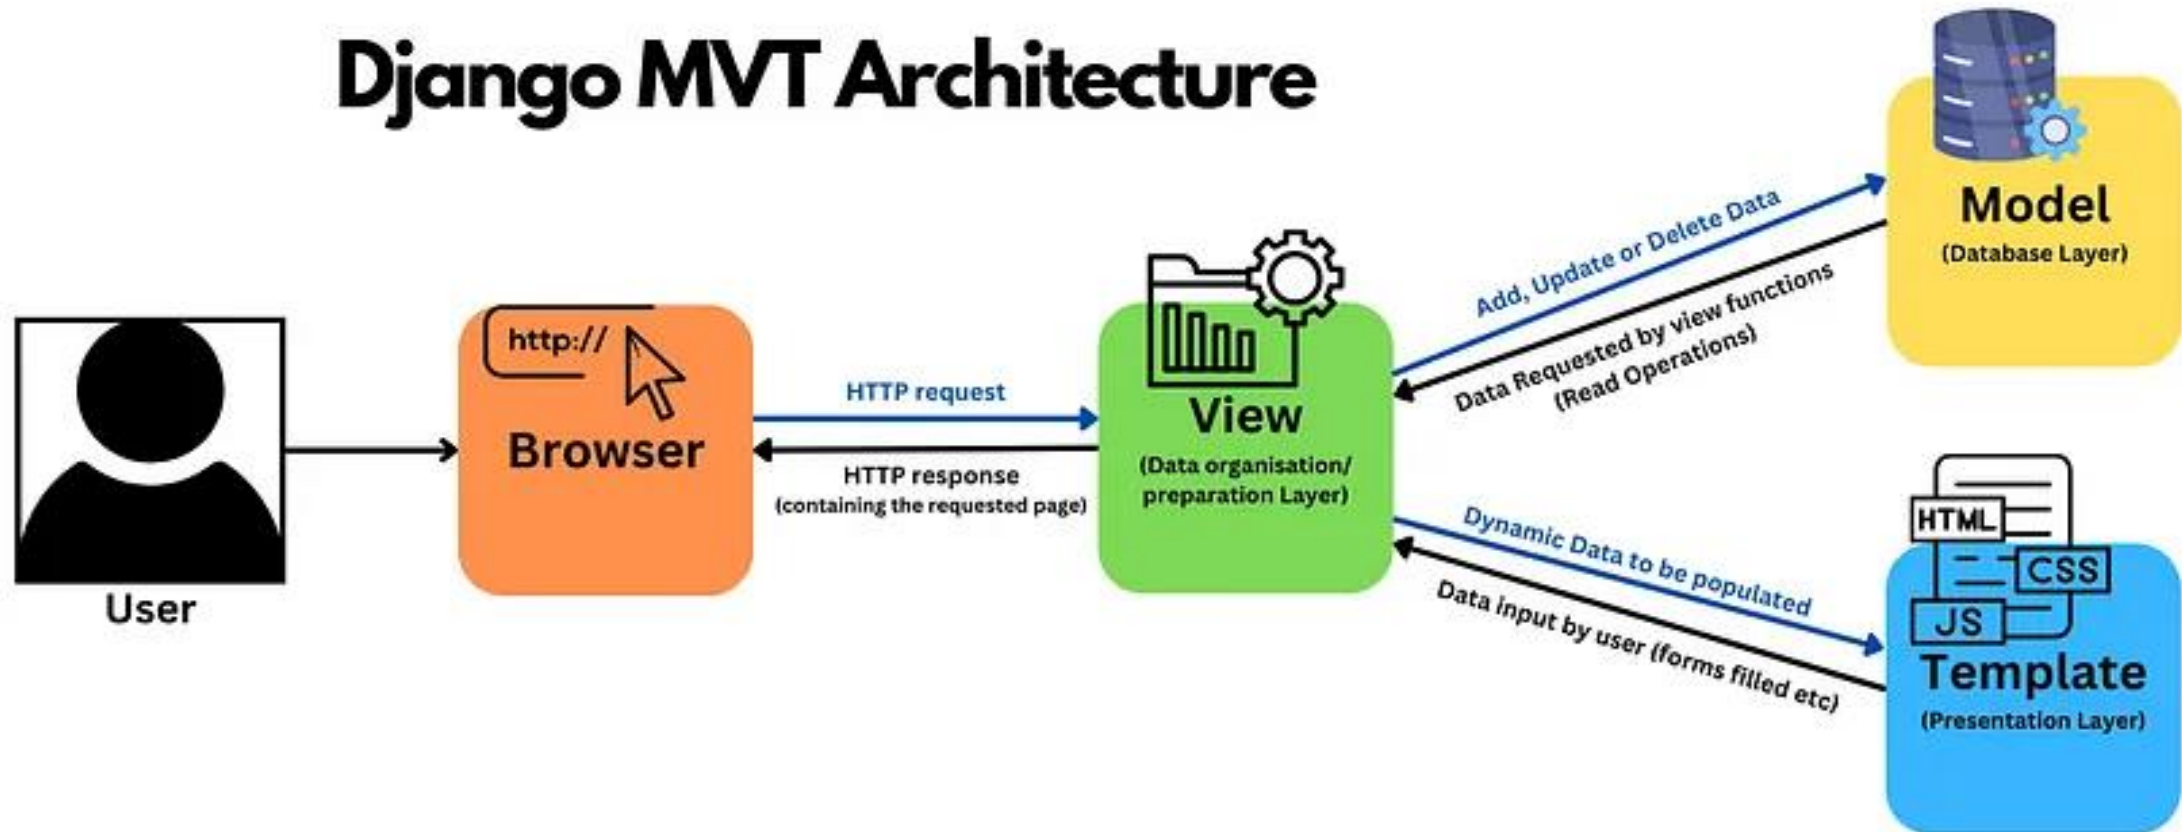

**Model:** The model is going to act as the interface of your data. It is responsible for maintaining data. It is the logical data structure behind the entire application and is represented by a database

**View:** It is a user interface to execute the logic and interact with the models. It is responsible for displaying all or a portion of data to the user.

**Template:** Template in Django contains the static content of a Django project like Html, CSS, and Javascript, along with the image used in the project.

## Django MVT Architecture

## Required Software

Python 3 (Latest Version)

VS Code

PyCharm

- ❑ **Project:** `django-admin startproject project_name`
- ❑ **App:** `python manage.py startapp app_name`
